

p+a furniture

fact sheet

p+a furniture aspires to set the standard for residential and contract furnishings, with a simple and modern aesthetic and an inherent sustainability. p+a furniture is designed to create beauty in the built environment, incorporating flexible and modular elements that seamlessly integrate into many interiors. p+a furniture builds upon the green innovation by designers at Penner & Associates, a leading sustainable interiors firm in Canada. Following incorporation of p+a furniture in 2007, research and development ensued, with the official opening of p+a's Vancouver showroom in June 2009 and launch of the online store in August 2009. More recently, the company has focused on expanding their signature centro line for hospitality environments with the green hotel room concept.

materials

Manufactured in Vancouver, p+a furniture casegoods are designed for sustainability, making efficient use of responsibly-sourced materials. Use of p+a furniture contributes to LEED® credits and points.

p+a furniture casegoods

- are regionally manufactured, if you are within 800 km/500 miles of our manufacturing facility
- utilize certified veneers and solid wood from sustainably-managed forests
- utilize salvaged solid wood
- contain no added urea formaldehyde in the composite woods and adhesives
- have a high percentage of post-industrial recycled content in the composite woods
- have post-consumer recycled content in the metal components
- utilize water-based, low-VOC stains and finishes
- use natural and rapidly renewable materials
- are packaged efficiently with reusable, recycled content and or recyclable materials

Veneer options include Forest Stewardship Council (FSC-certified) Eucalyptus, fumed White Oak, White Oak stained dark cacao, Douglas Fir and Maple. Other FSC-certified veneers can be sourced. Many centro elements can have opaque color accents. Details and dimensions of all centro elements can adjusted to suit the interiors.
