fact sheet

p+a furniture aspires to set the standard for contract furnishings, with a simple and modern aesthetic and an inherent sustainability. p+a furniture is designed to create beauty in the built environment, incorporating flexible and modular elements that seamlessly integrate into many interiors. p+a furniture builds upon the green innovation by designers at Penner & Associates, a leading sustainable interiors firm in Canada. Following incorporation of p+a furniture in 2007, research and development ensued, with the official opening of p+a's Vancouver showroom in June 2009 and launch of the online store in August 2009. More recently, the company has focused on expanding their signature centro line for hospitality environments.

centro contract + the green hotel room

The award winning centro line is integral to the green hotel room, which is organized into 3 zones — Live, Restore and Cleanse. A play on cantilevered forms, the centro line has been expanded with new elements for in-room work and relaxation, and space-efficient storage, with the purpose of enhancing the hospitality experience, well-being and comfort. The line includes headboards, mattress platforms, daybeds, entertainment units, mini bars, dining tables, desks, storage units and benches.

p+a furniture can also work with facility managers, consultants and design professionals to develop exclusive packages specific to hotel developments and chains. Packages will include elements essential to hospitality accommodation — materials, finishes, furniture, fixtures and equipment — and can extend to common and amenity areas. The design considers refurbishment cycles to renew the aesthetic in a cost-effective and sustainable manner, while meeting the requirements of applicable hotel rating systems.

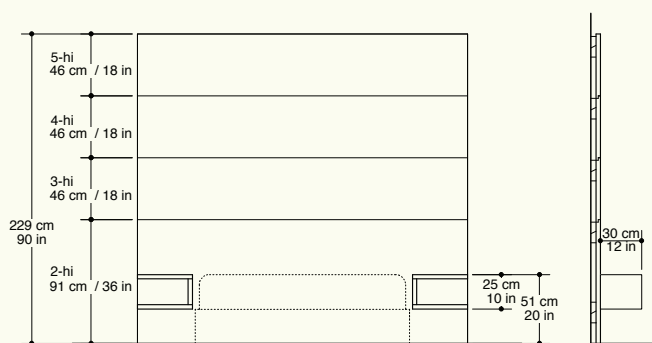

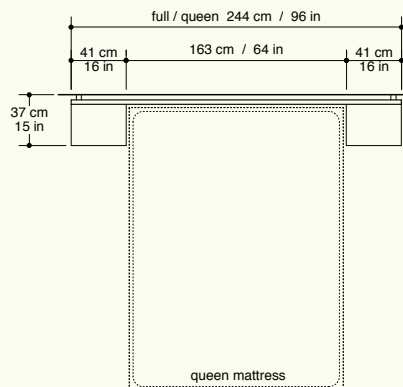

materials

Manufactured in Calgary and Vancouver, p+a furniture casegoods are designed for sustainability, making efficient use of responsibly-sourced materials. Use of p+a furniture contributes to LEED® credits and points. Contract orders of sizable volume for LEED® projects will be submitted for IAQ testing to meet the requirements of LEED-CI EQ Credit 4.5 Low-Emitting Materials, Furniture and Seating.

p+a furniture casegoods

- are regionally manufactured, if you are within 800 km/500 miles of our manufacturing facilities
- utilize certified veneers and solid wood from sustainably-managed forests
- utilize salvaged solid wood
- contain no added urea formaldehyde in the composite woods and adhesives
- have a high percentage of post-industrial recycled content in the composite woods
- have post-consumer recycled content in the metal components
- utilize water-based, low-VOC stains and finishes
- have a UV-cured top coat on wood veneers for superior durability
- use natural and rapidly renewable materials
- are packaged efficiently with reusable, recycled content and or recyclable materials

Veneer options include Forest Stewardship Council (FSC certified) Eucalyptus, fumed White Oak, White Oak stained dark cacao and Douglas Fir. Other FSC-certified veneers can be sourced. Many centro elements can have opaque color accents. Details and dimensions of all centro elements can adjusted to suit the interiors.

centro headboard | full/queen

2-hi | 3-hi | 4-hi | 5-hi stacking wall panels with cantilevered bedside tables

MATTRESS SIZES: full (54 x 75 in); queen (60 x 80 in)
